ABOUT ME

This is just a demo for the about me section. My name is Justin Baker, and I decided to change my occupation after five years of working in sales. I still like communicating with people and work in a team. I want to alter the accents a bit and switch to product management. As a sales agent, I learned what makes a product valuable and easy to sell besides promotion and persuasiveness.

EDUCATION

[SRM Institute of Science and Technology, Chennai](#)

May 2021- March 2025

B.Tech majoring in Computer Science & Engineering

CGPA: 7.50

[Sanskriti School, New Delhi](#)

May 2020- March 2021

Stream: Science (PCM)

Score: 92.55%

EXPERIENCE

[John Deere](#)

Pune

Software Development Engineer (Summer Internship)

- Collaborated in a cross-functional team of 5 interns (incl. software engineers and program manager) on an online resume builder.
-

PROJECTS

[Fake News Detection](#)

Fake news can cause considerable misunderstandings in society, and the consequences can be catastrophic. It is imperative to differentiate which news is true and which is not. This project leverages the help of machine learning algorithms to perform the classification/prediction of news as true and false. We will depict how good cleaning techniques of data can impact the performance of the fake news classifier in this project.

LANGUAGES

C, C++, Python, Java, Typescript

TOOLS & FRAMEWORK

Git, Elasticsearch, Selenium, Apache Spark, Apache Ignite, AWS (Kinesis, EMR, Lambda, S3)
